

Public Input for 2019 Strategic Plan

The Carroll County Board of Developmental Disabilities (Carroll Hills Program) would like your input on services needed in 2019.

1) How can the Carroll Hills Program better serve you? Please let us know your immediate needs and how the Board can help.

2) Please let us know how well Carroll Hills School is performing. How are preschool, school age, speech therapy, physical therapy, occupational therapy, transportation and transition to employment services operating at Carroll Hills School?

3) What are your thoughts on the Board's efforts to improve transition services and community employment?

4) What are your thoughts on early intervention services provided by Carroll Hills? Please let us know if you happy with speech therapy, physical therapy and occupational therapy services? Are you happy with early intervention services that are provided in natural environments like your home? Do you prefer early intervention services to be provided at Carroll Hills School?

5) Are you satisfied with the service provider options in Carroll County? Should the Board recruit more providers for day services, transportation, workshop services and community employment?

6) What are your thoughts on integrated services? Adult Individuals with developmental disabilities would receive their supports and services in the community alongside the general public rather than in designated workshops or day programs. We are very open to your input on how to improve the quality of life through integration.

7) Please give us feedback about the Board's efforts in promoting self-advocacy. How can the Board improve services to promote self-advocacy?

Please return this survey to Carroll Hills School or County Board Offices no later than December 21, 2018. Your input is valuable and appreciated as we formulate the 2019 Strategic Plan. Thank you!
